Fine Furniture from Poland

For over twenty years M7 Polska has been exporting furniture to clients from Germany, France, Ireland, Britain, Canada, Australia for whom we act as a sourcing agent.

We cover every spectrum of the furniture industry, from upholstered dining and living room furniture to solid wooden sideboards and tables, from Corian cupboards to steel shelving, from electric or manual recliners to medical cabinets, disinfectant covid trolleys and medical beds.

Many of the companies who produce for us have their own design capabilities, while some of our clients prefer our manufacturers to produce according to their own design. We are adaptable and can cater for your every need.

We at M7 Polska are a British-Polish family-run company, who understand the problems faced by our clientele from abroad, but also understand those faced by our Polish manufacturers.

We cross cultures and help to overcome any difficulty, any misunderstanding that may arise.

You can either locate your production in one of our many factories, or if you have a very specific request, we will search and select a factory especially for you.

We do not just leave it there though. We develop and nurture the project, helping solve all manner of issues that may arise: developmental, financial, contractual as well as logistical. In so doing we establish, on your behalf, long-lasting permanent relationships. (The very first manufacturer we visited in 2002, we are still working with today). None of us, are interested in "one-order-wonders", but we always have your long term interests at heart – which means our producers will concentrate on quality in order to win your repeat business.

Most of our furniture is made for the contract market

- Care homes and nursing homes
- Hospitals and institutes of challenging behaviour
- HoReCa
- Schools, colleges, universities
- Halls of residence
- Banks and offices

...as well as furniture for high street stores and on-line retail shops

This brochure only shows a very small range of our producers' capabilities. Whatever you may require, send us a picture, a sketch, a sample and we will do our best to help you.

We look forward to working with you and developing your sourcing possibilities in Poland.

SH: 48 AH: 58 OH: 81

We have worked with this company making recliners and armchairs for over 20 years. When we were commissioned to find a manufacturer to produce for a well-known British brand, this was the very first company we

visited in 2002. They have a large modern machine park, employ close to 100 skilled workers and their emphasis has always been on quality. As with all our other manufacturers, they are a joy to work with.

Bar Stools and Tables

Our producer of **café, bar and restaurant tables and bar stools** is a family run business using advanced technologies for the precise preparation of their furniture, of which there is a wide range to choose from.

They use stainless, austenitic stainless steel as well as chromo-nickel steels, approved for surfaces where there is to be contact with food.

The company possesses their own casting models for various types of bases as well as cast iron columns and connecting elements. Quality is second to none. They use profiles with a wall thickness of 2 mm, to give extra increased strength. Wooden columns are made of solid beech wood. They also offer a bespoke service for those special orders. They have their own modern machinery for tabletop production including a CNC machining centre and press. They use both wood-based materials and high-quality laminates.

Dining Chairs

We have been working with this company since 2009. A medium-sized family business, always ready to help, with modern machinery and 2 automated robotic paint lines. Nothing is ever too much trouble.

General specifications			Dimensions (cm)						
Name	Seat specification	Chair weight (kg)	Back height	Seat height	Armrest height	External width	Seat width	Total depth	Seat depth
PERLA 1 	Webbing	8	87	51	-	46	45	51	41

Care Home and Hospital

This family run factory has been operating since 1956, and is now run by the third generation!

It boasts a well-equipped, wide-ranging, modern machine park housed in 4 large production halls.

They make furniture for the home (living, dining room, kitchen and bathroom) as well as medical and hotel furniture. It goes without saying the factory is extremely versatile.

Surfaces and fronts can be made with plain melamine, painted MDF or vinyl wrapped MDF, depending on the choice of finish and the furniture's application.

DISINFECTANT TROLLEYS

- dimensions - H 1032 / W 554 / D 600
- weight - 60 kg

- Metabox drawers L350 H86 white with drawer stop

Electrically Operated Beds for Care homes and Hospitals

We are glad to have in our portfolio of companies an experienced manufacturer of rehabilitation and medical equipment. They have been producing solid, durable and ergonomic products since its founding in 1976. They export to many countries all over Europe and have a wide range of medical products to choose from, below you can see three samples. Some of which our clients have already started ordering.

HB 01

This is a multifunctional hospital bed for the treatment and care of patients in intensive care units and rehabilitation and cardiology wards.

CHB 01

The bed is intended for treatment and care at rehabilitation units, cardiac care units and for long term care in nursing homes. There is a four-segment mattress frame and the adjustment of segments is via electrical actuators controlled by remote control.

CHB 02

This rehabilitation bed is designed for long-term care. The wooden bed frame makes the bed ideal for nursing homes, residential care facilities, hospices and also for home care.
